

Introduction: God's Story

God is our father and an amazing creator. He made the whole universe and everything in it.

None of the things and the people he made were an accident either. That's right! He made everything with a purpose. We can see this even when we look outside.

A bird flying in the air was made to fly. A flying bird is different from other animal because they have smooth feathers to lift and soar through the air, they have very lightweight bones that are hollow and thin so it wouldn't weigh them down and they have a larger breastbone so they can attach the muscles they need to flap their wings.

With everything that God created, his most special creation was people! This means he made YOU too! You were also made with a special purpose for Him. God knows you are special and you are so loved by Him.

We can learn more about God's love through the bible, which is a very special book that was created by God.

The bible is made up of 66 different book written by many different people. What makes the bible special is that even though it is written by different people, all of those people were guided by God. It wasn't just their words they were writing, but actually God's words. The bible is God's Word.

Within the bible we will come to know God's Story. Then we can see how WE are a part of God's story.

Discussion Questions:

1. What makes the Bible special? (It is God's Word to us! There is nothing false in it and it works together as one story)
2. How was the Bible written? (It is written by God, through men; God inspired the words)
3. Do you trust the Bible? How can you know that it is true? (Because its God's Word)
4. Who can you read your Bible with at home?
